

# BSG Wireless participates in NGH Live Experience

## Wi-Fi Alliance, Wireless Broadband Alliance, and partners demonstrate roaming with seamless and secure access

Stop by the French Foyer this week where Wi-Fi Alliance® and Wireless Broadband Alliance (WBA) are co-hosting a demonstration of Wi-Fi roaming on a Next Generation Hotspot (NGH) network. Visitors will experience seamless network authentication where a number of the latest Wi-Fi CERTIFIED Passpoint™ devices will be made available for attendees to “roam” on to the live end-to-end demonstration network. Supported by various global service providers, the demonstration utilizes Passpoint equipment from multiple vendors and reflects significant momentum toward industry-standard easy-to-use Wi-Fi hotspots and roaming.

**Set up your device for the Wi-Fi Alliance Passpoint\_NGH demo network** so you can immediately benefit from an automatic connection to the Passpoint network.

When you are in the coverage area of the Wi-Fi Alliance Passpoint\_NGH network, you will automatically and securely authenticate onto the network based on your service provider credentials. The Wi-Fi Alliance Passpoint\_NGH network will be available in all the areas of the Wi-Fi Alliance member meeting where Wi-Fi coverage is available.

**In order to configure your device, please visit [URL-LINK](#).**

As you near the entrance of the venue in Chicago, you will receive a notification that you are authenticated on the Wi-Fi Alliance Passpoint\_NGH network. Verify you have automatically connected to Wi-Fi Alliance Passpoint\_NGH network after arrival.

For assistance while at the Wi-Fi Alliance member meeting, please visit the WBA Demo desk, located in the French Foyer.
